

# Business IT Solutions

## Practical benefits brought to real businesses

Business IT isn't meant to be difficult but when business needs change and systems malfunction, lack of technical capabilities and IT jargon can cause panic and frustration.

### Leave IT to us

Push IT Business Solutions provide remote and onsite IT support that removes the confusion, wasted time and loss of productivity experienced by many small to medium organisations when it comes to their IT systems.

### Tried and tested familiarity

IT solutions evolve but as an IT user, familiarity and easy functionality are essential to get the job done. Support from Push IT modernises and standardises your systems without compromising the structure and features you've become accustomed to.

- / IT Support Contracts
- / Efficient information sharing and external collaboration
- / Data network planning and deployment

### Complete flexibility

Robust IT infrastructure improves efficiencies, increases productivity and realises financial savings. Investing in the right systems will enable business scalability, process continuity and high-level security. Remote access and wireless capabilities support a mobilised workforce and around the clock communication.

- / Wireless networking
- / Secure VPN and Remote Access
- / Data Migration

### Affordable reliability

IT solutions are tailored to the needs of your business with transparent pricing and pragmatic advice. Whilst being innovative and on board with the latest technology, contingency planning and safety is paramount. IT solutions are approached with caution to ensure informed business decision-making.

- / Server Upgrades and Installation
- / Disaster recovery
- / Business continuity

### Responsive remote support

Online and telephone support is available to quickly diagnose problems via remote access to your desktop and troubleshoot faults whilst you're on the move with minimum interruption to your day.

### Expert onsite support

Highly skilled technicians with expert knowledge in IT systems and leading software manufacturers can be on site within guaranteed response times to keep your business at optimal performance.

### Protection and security

Unplanned or unmanaged business scaling can encounter disparity in processes, restrictions with IT product licensing and potential security vulnerabilities. Regular updates and reviews will apply preventative measures and protected systems.

- / System Monitoring and System Health Checks
- / Data Backup and Storage
- / Anti-Virus and Security Solutions

### Peace of mind for your business

Reliable IT is faster, less expensive and causes fewer problems – all of which equate to happier staff, more satisfied customers and improved profitability. And with Push IT it's easy to set up and won't cost the earth.

If you're looking to scale your business or improve the security, reliability or functionality of your IT systems, contact the team today.
